JOURNAL OF THE INTERNATIONAL SKY SCOUTS (UK)

CONTACT (UNITED KINGDOM) - formerly
INTERNATIONAL SKY SCOUTS ASSOCIATION (U.K.)

A worldwide non profit making educational movement devoted to U.F.O research and the promotion of greater awareness, working towards universal friendship and truth.

REFLECTIONS

We all have one great common interest, namely our interest in flying saucers or spacecraft. One of our great activities is Sky-Watching with the hope of seeing a U.F.O. This has happened, and on known occasions some have come close enough to be identified as spacecraft. Should spacecraft land and beings step out, we will of course welcome them as our guests. Whether anything is seen or not, organised sky watching is a most worthwhile group activity.

However, our interests are not restricted to the investigation, evaluation and filing away of U.F.O. sightings. We are also mentally alert to finding ways and means of having open traffic with other planetary inhabitants. We wish to know who the beings are and what the effect of their coming is going to have on our lives. It may well be fully understood by you all that the flying saucer story represents a veritable revolution in the whole of man's thinking, making it necessary for us to take the most searching look 'inwards' at ourselves, so that we can reach up to higher wisdom.

We who are aware of the existence of the space ships and the new avenues presented to us can become a bridge between our space friends and our planet. I personally believe that Contact will form a bridge and go forward as individuals of insight and integrity; true pioneers of the New-Age - people who adopt broad range and long range views and who at all times endeavour to follow the golden middle path, the sensible and clear-sighted way.

During the last few years there have been great changes indeed, and these changes are coming more swiftly every day. It has become noticeable that many people are now no longer satisfied with materialistic ideas and concepts alone, and are searching for deeper realities. Some, unfortunately resort to drugs to find these and in their trance think to have touched upon them, but alas, their transcendental experiences were nothing more than a projection on to the emotional levels bringing illusions and hallucinations, which leave them unsatisfied. (These drugs act on the brain mechanism, causing a break-through to the mental world. The great danger is then to enter into the lower psychic realms and touch upon para normal psychology.) When out of their trance, I don't believe for one moment that these people become instilled with permanent values to become truly mature, responsible and spiritually well balanced beings.

There is no denying that there is need for the people of today to find new horizons and the flying saucer breakthrough may give us these horizons. It can give us renewed purpose in life.

By supporting Contact we will make a joint effort to find greater truth and reality for the benefit of ourselves and our fellow passengers on this planet.

I firmly believe that we will supply a need, a need demanded by so many today. Thus, through the coming of the space craft, Contact can project new ideas and ideals to be shared, and to bring about a greater evolution in consciousness to those who are searching that they may heal and restore.

Johan Quanjer, National Chairman.

COMMON QUEST

By Anne Patterson.

Glancing back over the past decades, one sees a succession of Teds, Mods and Hippies - each group, in turn representing a section of our young people protesting against the accepted pattern of the society in which they live. While asserting their independence, they have, in fact, all climbed into a new uniform of their own choosing.

Why have none of these cults survived the test of time? It seems that a certain aimlessness has always predominated, resulting in the frustrating suppression of useful energies, or rather a failure to use these satisfactorily - aggression, vandalism and drug-taking have resulted.

Perhaps in our present Hippie Phase, the dawning of a new consciousness is shining through the network of beads, bangles and bizarre accessories - the realisation that some sort of purpose has been lacking. Their slogans of "Peace" and "Love is all" are, in themselves laudable, although perhaps depth and definition have received inadequate scrutiny, there is still something missing.

Can it be a sense of wonder? Is each boy and girl too bent on sophistication to steal away to be alone under the stars, and contemplate such square subjects as infinity, eternity or mental activity outside our own planet? And yet - the rapidly increasing number of Contact members suggests that a new awareness and curiosity is spreading amongst the young people of all countries.

They have no slogans, no fancy dress or uniform - simply a shared fascination concerning those things greater than themselves, and the possibility that very soon new knowledge may reach us from realms which our grandparents would have deemed too fantastic even to contemplate. Meanwhile, we are helped by our International Chairman's observations that there is something inspiring about the very act of looking upwards.....

INTERNATIONAL FLYING SAUCER SIGHTING DAY

By Brinsley Le Poer Trench.

(Extract from Sky Scouts International Newsletter)

There is no doubt at all that International Flying Saucer Sighting Day on June 24th (the 20th anniversary of Kenneth Arnold's classic sighting of nine gleaming discs in 1947) was a tremendous success.

The Flying Saucers flew over the world in great numbers and were seen by thousands of people. Over 45,000 Sky Scouts in 23 different countries invited the Sky People to come in their flying saucers and to show themselves on June 24th. The result was staggering!

Many people have criticised the idea of holding these special sighting days and have said you cannot order the saucers to appear at a specific time. I agree with that completely but these critics have missed the point. We do not order the saucers to appear. We invite the Sky People to visit us. Quite a difference!

Six U.F.O's which flew over Paraguay at great speed disrupted communications at the International Airport, Asuncion, for several minutes according to the director of the airport's control tower. People gazed from the streets and roof tops as the space ships flying in formation sped over the city at 2,500 ft.

Professor Ricardo A. Frondizi, Committee member in the Argentine (one of his younger brothers was actually President of the Argentine Republic a few years ago) sent me a most remarkable despatch. He reported that a month before June 24th a young man of about 19 years visited him. The boy, who refused to give his name, stated that on June 24th the space ships would come in large numbers, some from the North-East and some from the North-West. Those that came from the North-East would emanate from a UFO base in the Matto Grosso in Brazil and would fly over the Argentine Provinces of Misiones, Corrientes, Chaco (an Indian territory) and Santa Fe.

Those that came from the North-West would start from a UFO base at Nazca, Peru, and come through the Andes and fly over the Argentine Provinces of Salta, Tucuman, Santiago del Estero and Cordoba. This is interesting when we recall that some years ago two Peruvian airmen saw from the air thousands of straight lines radiating in all directions over Nazca. These lines had not been noticed on the ground for hundreds of years. In fact, the Incas built their great coastal road right through that area. For further details of this discovery please see my book "The Flying Saucer Story".

Professor Frondizi asked the boy how he knew all this would happen. "By telepathy," the young man answered. The Professor thanked him and I rather think put the matter out of his mind. After all there are a lot of cranks and hoaxers in this business. However on June 24th everything happened just as the boy predicted! The saucers came in their squadrons from both the North-East and the North-West and each lot flew over the Provinces as named by the boy.

On the return flight of those saucers that had come from the North-East, they were tracked back by both the police and the military, who in turn warned the airports in the Amazonian basin.

Here in England the Sky Scouts formed themselves into over 40 groups, some large and some small. It poured with rain but despite this setback there was a very good turnout of watchers. In England the watch was on a 24 hour basis and extended until Sunday morning the 25th.

RECENT SIGHTINGS:

Compiled by Brian S. Gill (Contact (UK) Research Officer).

Albury Sighting.

On June 27th, three days after I.F.S.S.D., Squadron-Leader Shirwright of Woking, Surrey, was walking with his wife along a track way across the Albury Downs from the beauty spot Newlands Corner. It was about 12.30 mid-day. In a field about a mile away they noticed what they thought at first was a white horse galloping. They soon saw, however, that it was round or egg-shaped and moving extremely rapidly across the field in a N-S, S-N direction. This continued for ten minutes, then the object moved to the southerly hedge of the field, changed direction to an eastwards motion, and began to move very slowly across the field. It continued across an open part of the field until it reached a line of trees, which it slowly climbed over. The object was still in sight when the witnesses returned to their car at 1.45.

June 28th: Five schoolboys at a sports meeting at Lyons Field, Greenford, were watching a Viscount aircraft flying against a cloudy background when they spotted two discs hovering in the North. The two light grey objects were joined by a third which floated up towards them. When the objects were an equal distance apart they flew off. On each could be seen three portholes and a flat-topped cabin. The objects were visible for eight seconds.

July 3: Mrs. Harris, of West End, Woking, had not been feeling well and had got up at about 1.00am. She looked out of a window and saw what she took to be a flashing aircraft light in the direction of Woking. Then it stopped, then moved towards her. As it came closer she could see that it was a brilliant orange disc. When it had reached the apparent size of "twice the size of a dinner plate" it suddenly speeded up and vanished in the direction of Chobham Common and Bagshot.

Warminster Sighting: A cigar shaped craft was sighted near Warminster in January this year. At 9.45 pm Sky Scouts Margaret Clayton and her fiance William Selby stopped their car mid-way between Warminster and Westbury to observe the cigar which was grey in colour and surrounded by a red glow as it hovered 45 degrees above the horizon. The object, which made no sound, was visible for 15 minutes. Miss Clayton estimated it as being 100 ft in length and about three miles away. Eventually it moved away to the north-west, gradually becoming dimmer and finally, fading from sight.

Saucer follows Viscount: Timothy Gardiner and his friend saw a Viscount cross the sky as they watched from their school at Solihull on the morning of February 21st. It was followed by an object "of a kind we had never seen before" they said. The object, dark grey and semi-circular in shape, was soundless. It then reversed direction, coming back part-way along the course it had just taken, hovered for about 30 seconds and then rose straight up and out of sight.

Cigar Shaped craft over Cardiff: Brian Wright, a zoology student, was admiring the view from the window of a University building in Cardiff at 5.20 pm on the 14th March, when he noticed "an elongated brilliant white craft" in the sky. The colour, he said, "was similar to that of burning magnesium." The cigar-shaped object was approximately two miles away; he was unable to estimate its true size. After five minutes it began to move away, gradually fading and eventually disappearing over the television masts at Wenvoe. The object was in view for a total of eight minutes.

"Rosy" U.F.O. Over Middlesex: Mr. J.R. Willson B.Sc. and his wife saw two independently moving objects travelling over Whitton in Middlesex in a South-westerly direction on May 4th. Mr. Willson described the objects as slightly rose pink in colour, elliptical in shape and quite silent in the zig-zag course.

Heathrow UFO: Two friends Richard Debowey and Michael Birch saw what first appeared to be a bright white light hovering in the sky early on the morning of the 9th May and later appeared as five lights forming an elliptical shape. They drove on down the road hoping to get a closer view and after passing almost underneath it, it suddenly disappeared in the direction of Heathrow Airport.

Sky Scouts see large UFO at Warminster: Mr. William Selby and his fiancée Miss Clayton and four other Sky Scouts from Birmingham saw a "huge orange oblong" at 3.30pm. on the 28th May this year. The object, which was sighted during an organised sky watch, was estimated to be about 200 ft. in length and about 50 ft high. The outline of the object, though indistinct seemed to be rectangular and the ends glowed a brighter orange than the centre section. It was about 500 yds away and about 150 ft above the ground. They observed the object for about ten minutes during which time it remained stationary.

Epping 'Cigar' Appears As Four Smaller Objects on Photo:

20-year-old John Lander and two friends were sky watching on 24th June, International Flying Saucer Sighting Day, when at 2.20 am they saw a bright red cigar shaped light over Epping going in the direction of North Weald. There was no noise and it was about three-quarters the diameter of the full moon. As it got nearer the ground the light intensified becoming nearly white. Then it seemed to stop and hover, swaying like a falling leaf. They watched the object for about five minutes then it shot off at tremendous speed towards London.

The three men took cine and still pictures of the object and on the sensitive film of a still camera the 'cigar' appeared as four semi-circular separate objects. (Camera:- Yashica Mat 35 mm. Set at f 3.5 for 1 sec.)

On 31st May about midnight Mr. Ronald Salisbury of Mearings near Reading noticed an unusual star which while moving slowly across the sky suddenly about turned and started pulsing irregularly then stopped. About three or four minutes later it was joined by two others which appeared bright red but these were not flashing. For the next two hours the three went through

several aerobatic movements in all directions across the sky until Mr. Salisbury went to bed at 2 a.m. During the time of this sighting his dog came out of the house, looked up and growled unusually and then ran back into the house.

Southend Sighting: Two brothers Robert and Richard Rowley of Poynings Avenue, Thorpe Bay, near Southend on Sea, watched what first appeared to be a very large star doing 'figure of eight' in the sky above their home at 10.45 pm on 16th July. It was first noticed by Richard aged 14 years from his bedroom window and he called Robert aged 18 years to watch. Whilst they looked it suddenly 'plummeted towards Earth' said Richard and they saw it as a red light moving Eastwards about half a mile away. Then it stopped and hovered for a few minutes and heading North it completely circled the house. Then Robert ran into the garden with his 25 40x30mm telescope leaving his brother in the bedroom and saw a blurred shape 'similar to a cigar' with five glowing red lights which then disappeared behind the neighbour's house roof. He then went to the front garden only to find that the object had vanished. Then the object reappeared heading South East towards the sea and he followed it with the telescope until it disappeared over the roof tops not to re-appear. When the object was circling the house they both heard a "swishing-whistling" sound which was unlike anything they had heard before.

Signals "Answered from the Sky." Rio de Janeiro, Aug. 14. - Flying Saucer fever has gripped Brazil again after a lawyer reported that one hovered over his car for 40 minutes flashing yellow and blue lights in reply to his headlight signals. Two other witnesses corroborated the story of Senhor Jonil Feydit Vieira, aged 28, published in the morning newspaper Correio da Manhã here. He said the UFO made several zig-zag passes over his car near the Rio de Janeiro state town of Francisco Fragoso. "After it followed my car for a while I began to get nervous, and flickered on and off, and then the object suddenly disappeared at a fantastic speed". (Credit the London Times, 15th August).

Police Sight Flying Saucer: Constable Steve Parsonage was proceeding along Liverpool Road on Aug. 10th, when he saw.... a flying saucer. Like a good policeman he made sure his evidence was corroborated. He flagged down Constable Lionel Haw, a colleague in the Wigan Division, who was approaching in a Panda car. And Police Constable Haw's notebook entry reads:

12.43am: Liverpool Road, Hindley. Saw object in sky, high altitude, travelling east, fast speed, round-shaped, not plane or comet. Also seen by P.C. Parsonage.

Said 20-year-old P.C. Parsonage: "I have never beleived stories about people seeing flying saucers but now I have seen one myself. I was on the beat when I glanced up and saw this saucer-shaped object in the sky. It was a good night with no clouds. It wasn't moving at first and was glowing white."

P.C. Haw, 30, who has been in the force eight years added: "We watched it moving across the sky for two minutes. It certainly wasn't a comet, plane or weather balloon or a trick of light. I have seen all these and know what I am talking about. I would estimate its size as well over 100 ft in diameter. It was very bright and didn't flicker. I checked with Jodrell Bank, Manchester and Barton Airports and was told there were no planes or satellites in the vicinity."

Constables Haw and Parsonage sent in an official report and were interviewed yesterday by their Chief Superintendent, Mr. Tom Andrews. Later Mr. Andrews accepted the reports and allowed it to be released.

(Credit Manchester Daily Express).

THE LAW OF ATTRACTION by Colin Watson.

The law of magnetism decrees that like forces repel, opposites attract and yet by one of those quirks of science this does not seem to apply to our personal and group magnetism.

If we take up a new hobby or sport, we very quickly find ourselves attracted and attracting types of similar nature and interests to our own.

Let us bear this in mind when on our Sky Watches.

Incredible as it may seem to the majority of us, it has been brought to our notice that some flying saucer enthusiasts have gone so far as to take arms with them in the shape of rabbiting guns on their sky watches - just in case of hostilities by the occupants of any landing UFO's.

If this is the type we wish to attract, we may very well do so - indeed someone not of our culture may, looking at us from the outside, think it is the proper thing to do.

Bearing in mind all possibilities and remembering the old phrase "Birds of a feather flock together", let us work on the idea that this law of attraction may well work among cosmic races, and go to our sky watches and meetings with keen anticipation and our most friendly feelings, developing a sincere desire to meet friendly and knowledgeable beings from another world.

The sooner we do, the sooner contacts will take place.

A VASTER REALITY. by Peter Coleman.

The football was pushed in my direction and I made a rather feeble attempt at interception, resulting in my both missing the ball completely and in my falling and twisting myself badly. I hobbled painfully off the pitch onto the relatively quiet sidelines where more sensible people were enjoying the pleasant pastime of reading books and magazines on the lush green grass. I chanced to lay my aching body close by a small bespectacled boy deeply engrossed in a public library book. Having nothing better to do (and wanting to take my mind off my recently incurred pain) I idly inquired what he was reading. With an embarrassed smile (and not realising that he was about to change the course of my life) he replied, "Flying Saucers Have Landed".

To cut a long story short I decided to follow up what seemed an intriguing, if somewhat lunatic fringe, subject. I read every book that I could on the subject, and slowly I became more fascinated and more awakened. A whole new Awareness was brought into my life. Like many other people interested in UFOs I found the subject had ties with many other interesting New Age topics. I soon discovered that to limit ones activities to purely UFO investigation and nothing else was the sure road to failure.

I tried to interest my friends in the subject and after I had overcome their natural ridicule and reluctance I found that they too became fascinated and often transformed in their approach to UFOs and life in general. Naturally I did not convince them all of UFO reality but I made a lot of them think and that was rich reward indeed!

However, there existed a real need for an organisation devoted to young people or young minds. I heard rumours that a new group for young people was indeed being formed - Contact. Overjoyed at this I joined the organisation and have watched its developments carefully. But it has only been quite recently that I realised that Contact would not fail and was in fact only just beginning its road to success.

I do not want to quote figures but suffice is to say that Contact is growing at a fantastic rate. The vast potential is only being realised now that our numbers grow daily.

A really wonderful thing about Contact is the way it is opening up new avenues of research and giving young people a new, vaster reality. As it changed my outlook on life so the simple fact that we are being visited by people from other worlds is changing the whole outlook of other young people throughout the world. We began as a mere ripple on a vast ocean, now we are building up to a great wave of new thinking.

Another purpose of Contact is to extend the hand of friendship to the people who pilot the UFOs. This has been variously called the vital link, the bridge, or the key to the enigma. It is the purpose of Contact to build that bridge, make that key and form that vital link.

Truth is so obscure in these times, and falsehood so established that unless we have the truth we cannot know it — PASCAL.

VISITORS FROM OUTER SPACE

By Vyacheslav Zaitse v.

- a strange story from the Tibetan border
reprinted with special permission from
SOVIET WEEKLY.

Expanding knowledge about the Universe usually means more puzzles than discoveries. As man unravels each new mystery he is assailed by fresh doubts and torments, for he had caught a glimpse of another mystery lying ahead.

For the explorer - in any field - it is probably this yet undiscovered territory vaguely seen in the distance that sparks the search for knowledge.

The German magazine Das Vegetarische Universum wrote: "For a quarter of a century archaeologists exploring caves in the Bayan-Kara-Ula Mountains, on the border of China and Tibet, have been finding odd-looking stone discs with hieroglyphs. A total of 716 such discs have been discovered, apparently dating back several thousand years.

Like a gramophone record, each disc has a hole in its centre from which a double groove spirals its way to the circumference. The grooves are not sound-tracks, but the oldest writing in China and indeed the rest of the world".

Archaeologists and decipherers of ancient writing racked their brains for two decades trying to solve the secret of the spirals.

The result of the research by the Chinese archaeologist was so shattering that the Peking Academy of Pre-History banned publication of his work.

Eventually permission was obtained and the professor and four colleagues published their collective efforts under the intriguing title Groove Writing Relating to Spaceships which, as recorded on the Disc, existed 12,000 years ago.

The caves high up in the Bayan-Kara-Ula Mountains are inhabited by the Ham and Dropa tribes - frail, stunted men averaging four feet two inches in height. So far they have defied ethnic classification. In fact, any detailed information about the tribes is extremely scarce.

When deciphered, one of the hieroglyphs presumably set down by an ancient member of the Ham tribe read: "The Dropas came down from the clouds in their gliders. Our men, women and children hid in the caves ten times before the sunrise. When at last they understood the sign language of the Dropas, they realised that the newcomers had peaceful intentions..."

Another Ham hieroglyph expresses regret over the loss of the tribe's own space-ships during a dangerous landing in high mountains, and the failure to build new ones.

In the opinion of Chinese archaeologists, the Bayan-Kara-Ula hieroglyphs are so mysterious that their interpretation and use for scientific research require the utmost care.

To obtain further information, the discs were scraped free of adhering rock particles and sent to Moscow for study. Scientists there made two important discoveries. The discs were found to contain a large amount of cobalt and other metals - a shocking discovery. Further investigation revealed that the discs vibrate in an unusual rhythm, as if they carried an electric charge or were part of an electric circuit. The 12,000 year-old discs remain a challenge to science.

Legends of ancient China say that small, gaunt, yellow-faced men came down from the clouds. But earthly tribesmen felt a revulsion for the visitors, whose enormous heads and extremely thin weak bodies made them look ugly, and some people on fast horses beat them. Reality seems to confirm the legends.

In some of the Bayan-Kara-Ula caves archaeologists and speleologists have found 12,000 year-old vestiges of graves and skeletons. The Chinese expeditions which discovered the burial grounds reported they had found "an extinct species of ape".

But so far as is known apes do not bury each other in graves or write hieroglyphic symbols on stone discs!

What makes the issue doubly involved is that the inner walls of the caves are covered in many places with pictures of the rising sun, the moon, and the stars, spaced by a multitude of pea-sized dots (possibly tiny pictures) which seem to be approaching the earth in a mountain area.

It would be of enormous help if, when corresponding with Officers of Contact, members would kindly enclose a stamped, self-addressed envelope.

PLANET POSITIONS by Bill Trotter.

Mercury:

September and October - Evening star, not visible.

Venus:

September: Morning star, the Moon is near on Sept. 30.

October: Morning star, Moon is near on Oct. 1, 29, 30.

Very bright.

Mars:

September and October: Evening star, not visible.

Jupiter:

September: Morning star in Leo. The moon is near on Sept. 3 and 30th.

October: Morning star. The Moon is near on Oct. 1, 28th and 29th. (Venus near up to Oct. 15th).

Saturn:

September: Rises 8.00p.m. The Moon is near on Sept. 19th.

October: Evening star. The Moon is near on Oct. 16th.

Uranus:

September: Morning star on Sept. 18th.

October: Morning star in Virgo.

Neptune:

September and October. Evening star in Libra.

SATELLITES visible from London: Echo I and II, Pageos A, Ariel 3 and 1. Also a Russian satellite, approximately on course W-E. This is a "pulser". Overhead in July, over to North in August. Further information can be obtained from the Sun or Guardian newspapers, or Mr. Keith Palmer.

CONTACT (U.K.)
WORLD HEADQUARTERS, LONDON. ENGLAND.

Membership:

In the United Kingdom, the annual subscription is 5/-.
For this a member receives a membership card, the quarterly magazine AWARENESS and all other relevant information.

For membership write to: Keith Palmer, Membership Secretary, 68 Ellenborough Road, Wood Green, London, N.22, enclosing a stamped addressed envelope, plus your subscription. We welcome all new members.

The cover of Awareness was designed by Len Wallings, Contact member from Southend. We have adopted the winged sun disc as our emblem. It represents to us both a flying saucer and winged thought. It is also symbolic of the New Age of awareness and widening horizons. This is the reason why we have called our journal "Awareness". It is also indicative of the psycho-spiritual evolution as can be observed today.

Johan Quanjer, the National Chairman, has recently made an interesting suggestion regarding local groups. He proposes that each group, as well as investigating sightings in its own area, skywatching, general discussion meetings etc., each should take a particular aspect of Contact activity and be the national centre for that activity. For example, the Southend branch has become the central sighting co-ordinators for Contact (U.K.) The N. Surrey branch has undertaken a special interest in Leys & Orthoteny. If you have any ideas as to what your local group could do, or any other suggestions, please send them to Johan Quanjer, 51a York Mansions, Prince of Wales Drive, London, S.W.11.

SKY SCOUTS HANDBOOK is a good introduction to Sky Scouts and flying saucer research in general. 3/- post free from J. Goddard, 43 Walton Bridge Road, Shepperton, Middlesex.

UFO Photographs now available. 6" x 3" set of 12, only £1 from W.J. Trotter, 3 Osterberg Road, Dartford, Kent.

Sighting reports requiring investigation should be sent to Brian Gill, Research & Evaluation Officer, 33 Grovewood Avenue, Eastwood, Leigh-on-Sea, Essex.

EDITOR: Jimmy Goddard, 43 Walton Bridge Road, Shepperton, Middlesex. All contributions, letters, articles, etc., welcomed.

If your subscription is due or over-due, would you please send your renewal to the Membership Secretary, otherwise you may miss your copy of "Awareness."

HANDBOOK ON LEYS & ORTHOTENY: A new publication, edited by Jimmy Goddard, covering all orthoteny's and major leys in Great Britain, with some practical hints on ley hunting and other interesting discoveries. A MUST for every member. Obtainable from J. Goddard, "Wynchlands", Walton Bridge Road, Shepperton, Middlesex. Price 2/- inc. postage.
